

PROFESSIONAL SUMMARY

- Software engineer with nearly 6 years of experience developing and modernising Java 8/11 and Spring Boot applications across government, capital-markets, and telecommunications environments.
- Hands-on experience building event-driven microservices with Kafka, real-time WebSocket services, Redis caching, relational database migrations, and automated delivery pipelines.
- Experienced in full software delivery: requirements, architecture collaboration, implementation, testing, production troubleshooting, code review, Agile ceremonies, and mentoring junior developers.

TECHNICAL SKILLS

Backend	Java 8/11, J2EE, Spring Boot, Spring Core, Spring Security, JSP/Servlets, REST services, microservices
Messaging & data	Apache Kafka, WebSockets, Redis, PostgreSQL, MS SQL Server, MySQL, Oracle, Ingres, SQL, Hive
Frontend	JavaScript, HTML
AI-assisted development	GitHub Copilot, Continue.dev, Kiro
Testing & quality	JUnit, Postman, SonarQube, code reviews
Delivery & platforms	CI/CD, Jenkins, Harness, GitHub Actions, Git, GitHub, Maven, Gradle, OpenShift, Linux/Unix
Operations & Agile	Splunk, Elastic APM, Grafana, Jira, Confluence, Scrum, production debugging

PROFESSIONAL EXPERIENCE

Senior Developer — Accenture, Revenue Commissioners

Apr 2026–Present | Dublin

Modernisation of applications supporting Ireland's national tax and customs administration.

- Modernise legacy Java JSP/Servlet and C-based applications into maintainable Spring Boot microservice and web applications.
- Develop and enhance Java/Spring Boot backend services while integrating migrated components with existing systems.
- Use Continue.dev and Kiro AI development agents to support implementation, code analysis, debugging, and developer productivity.
- Migrate Ingres databases to PostgreSQL through schema conversion, data mapping, query optimisation, and compatibility analysis.
- Re-platform Talend Studio and Linux shell batch jobs, restructuring schedules, dependencies, and error handling for the target architecture.
- Analyse legacy code and dependencies to define migration strategies that support stable system transitions.
- Partner with cross-functional teams to validate migrated functionality through testing, debugging, and application-stability checks.

Software Development Senior Analyst — Accenture, Wells Fargo

May 2024–Mar 2026

New Issue Trade Execution platform for institutional Debt Capital Markets workflows.

- Developed Spring Boot services supporting trade-data structuring, tranche management, order blotters, and trade-lifecycle workflows.
- Designed Kafka-based asynchronous messaging and event processing for high-throughput, real-time trade data.
- Integrated WebSockets to stream trade updates and improve responsiveness for monitoring users.
- Implemented Redis caching to reduce database load and improve service response times.
- Investigated production issues with Splunk and Elastic APM, tracing failures through logs and application telemetry.
- Used GitHub Copilot for AI-assisted software development, including implementation, refactoring, and test support.
- Built JUnit tests and used SonarQube to strengthen reliability, code quality, and security compliance.
- Automated deployments through Harness and GitHub Actions CI/CD pipelines, reducing manual release activity.

PROFESSIONAL EXPERIENCE — CONTINUED

Full Stack Java Developer — Tata Consultancy Services, Verizon Nov 2020–Apr 2024

Web-based Fiber Inventory Management System used to manage fiber connections and inventory data.

- Designed, developed, and maintained a web application using Java, Spring Boot, and frontend technologies.
- Worked with cross-functional stakeholders to gather requirements, shape system architecture, and deliver application features.
- Tested, maintained, and recommended software improvements to strengthen functionality and performance.
- Conducted code reviews and mentored junior developers, improving code quality and team knowledge sharing.
- Identified automation opportunities and used Git-based workflows to streamline software development.
- Participated in Agile sprint planning and retrospectives and maintained technical documentation for onboarding and knowledge transfer.

SELECTED ENGINEERING STRENGTHS

Microservices & integration

Java/Spring Boot service development, asynchronous Kafka messaging, legacy integration, REST services, and event-driven design.

Reliability & troubleshooting

JUnit testing, SonarQube analysis, Splunk and Elastic APM diagnostics, debugging, and application-stability validation.

Modernisation & data

Monolith-to-microservice transformation, Ingres-to-PostgreSQL migration, batch-job re-platforming, SQL optimisation, and Redis caching.

Software delivery

CI/CD with Harness, GitHub Actions, and Jenkins; Git workflows; Agile planning and retrospectives; technical documentation.

EDUCATION

Lingaya’s Vidyapeeth Jul 2015–Jul 2019

ADDITIONAL TECHNOLOGIES

Data structures and algorithms • Design patterns • Maven • Gradle • Jira • Confluence • Grafana • OpenShift • Talend Studio • Linux shell scripting

Domain experience: Irish government tax and customs systems; Debt Capital Markets and trade banking; telecommunications fiber inventory.
